

# Australian Listed Property Trust Portfolio

## Performance Report – May 2018

### Market overview and portfolio performance

**Scott Bender**  
Portfolio Manager

The DNR Capital Australian Listed Property Trust Portfolio underperformed the index in May by 1.44%. The S&P/ASX 200 A-REIT Accumulation Index was up 3.07%.

It was a busy month for the sector with mergers and acquisitions action in Investa Office Fund (ASX:IOF) with Blackstone making a non-binding proposal to acquire 100% of IOF at \$5.25 (\$5.15 excluding distribution). IOF ended up 15% for the month. IOF is not held in the Portfolio.

Vicinity Centres (ASX:VCX) ended up 9.40% for the month. VCX announced its FY18 guidance was towards the top end of guidance range.

The key underperformer was Westfield (ASX:WFD) ending down 3.9% for the month. WFD delisted on 30 May and investors were selling WFD and buying A-REITs in anticipation of this delisting. Security holders received 1x One Market (ASX:OMN) share for every 20 WFD. Security holders also received 1x Unibail-Rodamco (ASX:URW) for 2.71 WFD. Security holders also receive US\$2.67 for each WFD held.

Performance data relates to the DNR Capital model portfolio. Performance of an investment in this model portfolio through a Portfolio Service may have different performance to the performance in this monthly update as a result of different policies and procedures at different Portfolio Service operators.

Past performance is not an indication of future performance. No allowance has been made for taxation and fees are not taken into account.

## Investment philosophy

DNR Capital believes that quality businesses outperform through the cycle and focuses on identifying those quality securities that can defend and grow their business and purchases them when they are trading below intrinsic value. By maintaining a strong valuation discipline with a medium-term focus, DNR Capital looks to identify those securities where the current price does not fully reflect the intrinsic value.

## Investment strategy

The investment process uses a combination of bottom-up security selection with a top-down overlay.

The bottom-up security selection process will favour those with the following characteristics:

- Strong underlying assets—DNR Capital believes higher quality assets will outperform through the business cycle both in terms of capital appreciation and yield growth.

- Low-debt to medium-debt levels—DNR Capital invests in securities where the debt profile is appropriate given the quantum and nature of cash flow produced from the underlying portfolio.
- High-quality management with a strong track record of delivering asset and share price performance.
- Stable portfolio investment strategy—DNR Capital believes a changing asset mix can be a signal of problems or poor management.

DNR Capital follows a range of economic indicators that are reviewed regularly from a top-down portfolio perspective. These measures are used to formulate an economic overview which provides a backdrop to investment decision making and influences portfolio construction.
