3 This estimate is based on the average of the actual performance fees for the last five financial years ending 30 June 2024 expressed as a percentage of the net asset value of the Fund. It is not a forecast of any future performance fees. The formula for calculating the performance fee is set out in the ‘Additional explanation of fees and costs’ section in section 3 of the Reference Guide to the PDS.

4 The transaction costs shown are based on the transaction costs for the financial year ending 30 June 2024 and are shown net of any recovery received by the Fund from the buy-sell spread costs charged on the issue and withdrawal of units for the same period.

## 2. Example of annual fees and costs

The following “Example of annual fees and costs for the Fund” replaces the “Example of annual fees and costs for the Fund” in section 6 of the PDS and contains the change in the estimated performance fees and estimated transaction costs:

The following table gives an example of how the ongoing fees and costs applicable to units in the Fund can affect your investment over a one (1) year period. You should use this table to compare this product with other products offered by managed investment schemes.

Example	Amount	Balance of \$50,000 with a contribution of \$5,000 during year
Contribution Fee	Nil	For every additional \$5,000 you put in, you will be charged \$0.
Plus Management fees and costs	1.15% <sup>1</sup>	And, for every \$50,000 you have in the Fund you will be charged or have deducted from your investment \$575 each year.
Plus Performance fees	2.10% <sup>2</sup>	And, you will be charged or have deducted from your investment \$1,050 in performance fees each year.
Plus Transaction costs	0.12% <sup>3</sup>	And, you will be charged or have deducted from your investment \$60 in transaction costs
Equals Cost of Fund		If you had an investment of \$50,000 at the beginning of the year and you put in an additional \$5,000 during that year, you would be charged fees and costs of \$1,685. <sup>4</sup> What it costs you will depend on the investment option you choose and the fees you negotiate.

Please note that this is just an example. In practice, your investment balance will vary, as will related fees and costs.

- 1 Management fees and costs quoted are inclusive of GST and net of any RITCs at the prescribed rate, which is currently either 55% or 75% (depending on the nature of the fee or expense).
- 2 This estimate is based on the average of the performance fees for the last five financial years ending 30 June 2024. It is not a forecast of any future performance fees.
- 3 This figure is net of the amount recovered via the buy-sell spread charged on the issue and withdrawal of units for the financial year ending 30 June 2024.
- 4 Assumes the additional \$5,000 was invested at the end of the year.

## 3. Additional explanation on fees and costs

The following section replaces the “Transaction costs” information contained in section 4 of the Reference Guide (page 7) and contains the change in the estimated transaction costs:

### Transaction costs

Transaction costs associated with dealing with the Fund’s assets may be recovered from the Fund.

Transaction costs may include brokerage, investment settlement fees and clearing costs when underlying assets are bought or sold and are paid from the Fund assets when incurred.

Transaction costs incurred as a result of unitholders coming into and going out of the Fund may be recovered by way of the buy-sell spread charged to investors.

Transaction costs not recovered through the buy-sell spread are additional costs to investors that reduce the assets of the Fund and are in turn reflected in the unit price. The transaction costs amount shown in the ‘Fees and costs summary’ in section 6 of the PDS are the transaction costs incurred for the 12 months to 30 June 2024 as a percentage of the NAV of the Fund, after taking into account the costs recovered by way of the buy-sell spread. The gross transaction costs (before taking into account the costs recovered by way of the buy-sell spread) incurred for the 12 months to 30 June 2024 as a percentage of the NAV of the Fund for that period is 0.30% p.a. and calculated to be \$150 based on a \$50,000 holding.

Transaction costs may vary for many reasons. As an example, brokerage varies as a result of the turnover in the underlying assets of the Fund as investment and market conditions change, which may affect the level of transaction costs not covered in the buy-sell spread.

#### **4. Other updates**

In addition to the abovementioned sections, the following information replaces the first paragraph of the 'Performance Fee' information contained in section 4 of the Reference Guide (page 5) and contains the change in the estimated performance fees:

Depending on how the Fund performs, the Investment Manager may be entitled to a performance fee which is payable by the Fund. The performance fee percentage contained in the 'Fees and costs summary' and the 'Example of annual fees and costs' table in the PDS is calculated as the average of the performance fees paid by the Fund for the last five financial years ending 30 June 2024 (being \$1,050 based on a \$50,000 holding) as a percentage of the net asset value of the Fund. Investors should understand that past performance is not a reliable indicator of future performance.
